

SEARL MAGNETIC INC – USA. 23.09.2010.

Dear Supreme Master Ching Hai.

Thank you for the help given over the years and your funding sent, which is highly appreciated.

I hate begging, but at this time we need all the help we can get as time is running out to get another 3000 or more votes to win in the \$200M prize draw; being only 7 days left to go.

Would it be humanly possible to request all your members who watch Supreme Master TV to add a vote to Searl magnetic Inc for funding of the SEG to speed up the work now started in the USA, its free no money is involve to vote. The company is being changed from a factory, which it was to the research and development side of this special magnetic wave needed for the SEG production to take place.

I appreciate that your word requesting people to vote carries a lot of weight to get 3000 votes in time to win funding.

The site is in California – Fernando Morris is in charge of its conversion – and the research that will take place there for the SEG to go into mass production, would be speeded up if big funding took place.

The SEG technology is so urgently needed for this planet – we have requested HRH Prince Charles to add his vote as well. But one more vote is not enough we need at least another 3000 votes to stand a chance.

If a film clip could be made by your interview personal; with Morris email [fdmdisc@hotmail.com](mailto:fdmdisc@hotmail.com) in California to meet him and film the demos and building to show its true in time to win those votes needed, in my heart I feel you would win those votes for us.

I appreciate that I might be asking for the impossible to happen – but on behalf of the few who are actually helping with the work without pay: like myself, no work would have been achieved to this date, even Bradley Lockerman, the film producer has join the free labour work party at the site to help with the work to speed it up.

It is on their behalf that I make this request to you and trust that within your heart you will find time to help speed up these votes for all humankind regardless and planet Earth.

To all of us; you are indeed an angel for planet Earth and we all thank you for your efforts to change the world for the better. May all your efforts succeed; we wish you well and may good health follow you wherever you are.

Bless you.

Please take care life is short: use it wisely.

On behalf of all members,

I remain yours in the work to create a better world for all humankind regardless.

Prof. John Roy Robert Searl.
