

UFOs - A COVER-UP?

Recent UFO sightings in the area "are quite possibly the work of government and military intelligence organisations" which are testing technologies that have been kept secret for more than 50 years.

The startling claims have been made by a Kincumber engineer who once worked with an English-based professor who invented an energy source in the 1940s.

"Simply, crafts built by Professor John Searle in England created their own gravitational field which repelled the Earth's gravitational field," the engineer, who preferred not to be named, said.

"They generated electronic voltages that ionised the air, became inertia-free, and had the ability to travel in a vacuum of air at speeds of more than 15,000km/h.

"Many governments, particularly that of New Zealand, witnessed these objects in flight, but the technology has been kept under wraps for fear of destroying the world's oil, coal and atomic interests, and thus the world economy," he said.

"It's the biggest secret in the history of mankind."

● The Independent Network of UFO Researchers has been overwhelmed by the interest in its public meetings planned for Gosford RSL Club this Saturday. Both meetings are now booked out but people still interested are encouraged to register their names for a third meeting which will be held at a later date. The network can be contacted on (02) 553-9406.

If you're
going to be
away,
vote today.

Federal Election,
Saturday, March 2nd.

If you have a valid reason why you won't be able to get to a polling place on election day, vote today at any AEC Office or Pre-Poll Voting centre. Or pick up an application form for a postal vote from any Post Office or AEC Office. If you have any enquiries call the AEC on 13 23 26.
